

# Clinic Management

## Integrated Clinic Management

The Talenger Clinic Management module is fully integrated with the Talenger suite of products which helps in efficient clinic management.

Apart from the standard features of other clinic management software, Talenger Clinic Module was developed considering the end user in mind. Talenger, 'ease of use, speed in retrieving information, multi-user functionality and manageability are exemplary compared to other applications.

## What does Talenger offer?

Talenger offers functionality for the equipment inventory, management and maintenance schedules of clinic equipment, medicine stock on hand value, minimum order quantities, patient information including history, treatment and clinic visit costs, prescribed medication, patient reports.

## Employee Health Care - Information at your fingertips!

**No more searching for employee/patient files.** To search for a particular employee/patient file, simply type in the first few letters of the patient's last name! The file appears instantly and complete patient information is available in his or her record

## What we deliver
